

MINT SOFTWARE SYSTEMS SIGNS WITH AVIANCA HOLDINGS S.A. FOR GROUP WIDE TRAINING MANAGEMENT SOFTWARE DELIVERY

Kiel, 15th of August 2014 - MINT Software Systems today officially announces the signature of a service agreement with the Avianca Holdings S.A. that incorporates the delivery of an all-inclusive training management solution to all of the eight group's airlines.

The German software provider MINT Software Systems has signed a service agreement for the delivery of its comprehensive training management solution MINT TMS to eight airlines that are part of the southern American Avianca Holdings S.A. MINT TMS will be used as an AQP Training System for flight crew, flight attendants and dispatchers training, with a strong focus on records management and AQP data collection and analysis.

“We are very happy to have found MINT Software Systems as reliable partner that is capable to provide our new training management solution to the whole group, to allow us combining all our training and records management standards in one software solution. MINT's outstanding training optimization and AQP data management capabilities will give us a great advantage ahead of our competition, as we will be able to educate our pilots in the most effective and best possible way and therefore can continue to provide a safe and reliable product to our customers”, said Avianca Holdings CEO Fabio Villegas.

“We are very pleased to welcome all eight Avianca Holdings S.A airlines as our newest customers and to helping them to optimize the training management at all of the groups' airlines in same time”, says Christian Hollmann, Vice President of MINT Software Systems. “They are very important customers to us and we are very excited to starting the implementation of the first software modules for AQP management already during the coming few weeks”.

MINT Software Systems will provide its proven and fully web based training management system MINT TMS as hosted SaaS solution and will also implement the MINT CalendarSync and FAA Reporting Add-Ons, as well as various interfaces to connect existing IT systems such as SIO and NetLine at the different group airlines headquarters with the new, central MINT training management database.

ABOUT MINT Software Systems
