

AZUL LINHAS AÉREAS BRASILEIRAS IMPLEMENTS MINT TRAINING MANAGEMENT SOFTWARE IN RECORD TIME!

Kiel, 23rd November 2015 - MINT Software Systems recently signed a service agreement with the São Paulo based airline Azul Linhas Aéreas Brasileiras. The training management solution MINT TRMS went live after less than two weeks' implementation time and will be used as all-in-one solution for training scheduling, e-grading and records management for all cockpit and cabin personnel and as a full replacement of outdated software systems.

“We are very happy to welcome Azul Linhas Aéreas Brasileiras to the growing MINT user community”, says Christian Hollmann, VP of MINT Software Systems. “Our partners at Azul have selected MINT to substitute their legacy systems, which were in many ways not capable to fulfill their continuously increasing training requirements. Our software experts went on-site right after the contract signature to immediately start the scheduler training and software implementation. Only a few days later our software went live into production and Azul are now building the required qualification structure and training curricula into the MINT database”, he explains.

“We were especially impressed by the extraordinary flexibility of the MINT product and the powerful tools for training scheduling, e-grading and records management”, says José Jovita Mello Filho, IT Manager at Azul. “Additionally, the demonstrated skills implementing the MINT system into operative training branches at several large airlines who were seeking to replace their existing systems, has driven our decision”, he explains.

MINT TRMS allows airline customers to optimize their training workflows and speed up the training planning and performance with exceptional scheduling and electronic data gathering and analysis capabilities. This unique platform helps airlines all over the globe to significantly enhance their training efficiency and the day to day life of all crews and instructors with the instant online access to their training schedules, electronic forms, learning material and other training related data in the integrated and multifunctional web portal.

The agreement signed between the airline and MINT Software Systems includes the delivery of the SaaS version of MINT TRMS for training scheduling, e-grading, record management, training data collection and analysis for all flight crew at Azul Linhas Aéreas Brasileiras.

About MINT Software Systems

MINT Software Systems, headquartered in Kiel, Germany, with representations in Sharjah (UAE), Bucaramanga, (Colombia), and Orlando, (USA) creates innovative training and learning management solutions used by major aviation players.
